

Demo guide: a booking call in 15 minutes

For the M&U presenter. Demonstration data only, labelled "Illustrative demonstration". Say every limit out loud.

Check first: is booking live on the demo line today? (receptionist *docs/BOOKING-DEMO-ENABLEMENT.md* STATUS). **No → Mode A.** Yes, and the owner's 5 retest calls passed → Mode B. Never present the live line as booking until it does. **Also check** which Booking Mode this prospect qualifies for (Booked vs Booking request/lead capture — ask "which system do you use" before the demo) and never demonstrate "Booked" behaviour to a Booking-request prospect.

Min	Step	Mode A (before go-live, default)	Mode B (after go-live)
0–1	Their calls	Their site: hours and how patients book. "Which calls would you want it to take: after hours, overflow, or all calls alongside your team?"	Same
1–5	A booking call	Booking video labelled Illustrative demonstration (fictional practice), or walk the call flow below. Optional: ring the live line after saying "today it takes a message; it won't book".	Ring the demo line on speaker, choose dental, book a check-up, show the SMS on your own phone.
5–7	Urgent path	"My face is really swollen and I'm struggling to breathe" → 000 line first, then urgent message. "It never decides how serious something is."	Same, live
7–9	What the team sees	Dashboard with demonstration calls only : booking, email alert, message queue, minutes used. "Alerts switch on with booking at go-live."	Same, with the booking you just made
9–11	Calendar fit	Direct booking depends on your system: we confirm compatibility during setup, or agree a booking-request / lead workflow. Google Calendar or Cal.com, not Dentally/Core Practice. A dedicated calendar with released slots works.	Same
11–12	Failure paths	Asks for a person → message (live transfer isn't offered). No slots → message. Changes mind → moves the same-call booking.	Same
12–14	Package	Recommend one: Essential A\$699 · Professional A\$1,099 · Premium A\$1,999 a month, ex GST, + 10% GST. Setup: quoted separately once approved.	Same
14–15	Next step	"Each business's booking, routing and texts are set up and tested before they go live. Shall I send the proposal?"	Same

The call flow to narrate (Mode A)

"Thanks for calling [fictional practice]. This call is recorded. You're speaking with an automated assistant." → caller asks for a check-up → it asks new or existing, offers two times from released slots → caller picks one → "Shall I book that?" → calendar confirms → "You're booked for [time]. Your reference is [ref]." → asks consent to text a confirmation → "Anything else?"

Per-prospect demo close (once live — check first)

Once *D:/MU-Receptionist-wt-prompt/docs/PROSPECT-DEMO.md* confirms the per-prospect demo is live and retested (it did not exist as of 27 Sep 2026): "Ring this number from your practice phone now — you'll hear a

demonstration receptionist we built from your public website." Built from their public site only, still discloses AI + recording, still 000 first, still whichever Booking Mode fits their system. Until that doc says it's live, don't offer this — run Mode A/B above instead.

Never

Use a real patient's or prospect's details · show a real caller's call · position it as missed-call cover or promise bookings/revenue · offer any pilot, trial or setup waiver · quote a setup amount · claim it transfers, integrates with practice software, or is live with other practices · give out the demo number as a booking demo before go-live · demonstrate "Booked" behaviour to a prospect who only qualifies for Booking request / lead capture.
